SGG MASTERGLASS®

Bringing glass and light together for visual effect!

Applications

This contemporary range of design glasses bring style and brilliance to any application. It is ideal for creating sophisticated environments, in residential, commercial and retail settings (offices, shops, hotels, restaurants etc).

SGG MASTERGLASS can be used extensively, including applications such as:

- Partitions (framed, frameless, fixed and sliding)
- Doors (all-glass and framed)

- Windows and façade glazing
- Shower screens
- Furniture (shopfitting, shelving, countertops, cabinets etc)
- Guarding and balustrading
- Screens
- Floors and stair treads
- Street furniture

Advantages

• An exclusive design

With its five patterns, the SGG MASTERGLASS range inspires a fresh approach to any glass application.

It is a range that feeds the imagination.

• Light and privacy

SGG MASTERGLASS glass captures light and emits attractive aesthetic effects. Its high degree of translucency optimises light levels, whilst providing subtle obscuration for privacy and screening.

• Aesthetics with safety

For locations and applications requiring safety glass, SGG MASTERGLASS can be used in either toughened or laminated form, in order to comply with current national standards and regulations.

Silvered SGG MASTER-LENS brings a sense of seclusion and subtlety to the contemporary setting of this rest area.

SGG MASTER-LENS®

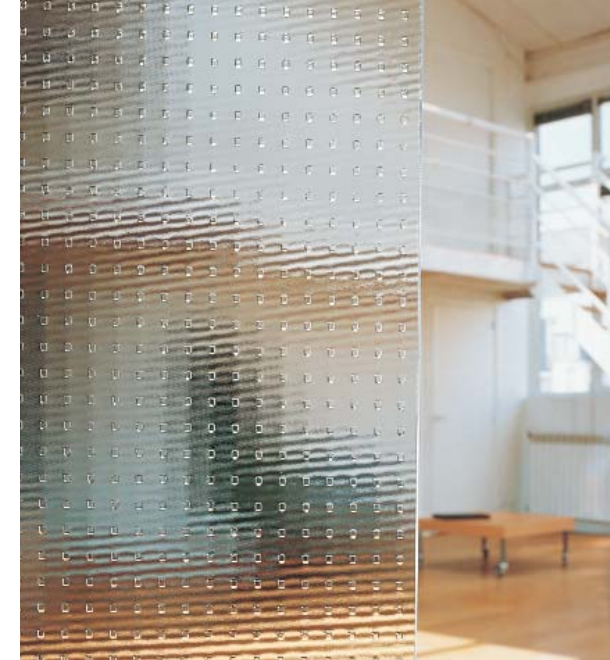

SGG MASTER-CARRÉ®

The use of SGG MASTER-CARRÉ in this partition has a calming and harmonising effect, providing light in the corridor and the required level of privacy in the office.

*Mayor's Office, Avon, France
Architect: S. Rapaport*

In double-glazed form, SGG MASTER-CARRÉ makes an attractive feature in this bathroom, ensuring the comfort and privacy of the house-owner.
Bathroom by Jacob Delafon

In this waiting area, SGG MASTER-CARRÉ simulates and complements the screen-printed pattern in the external glazing.
Novotel Hotel, Zaventem, Belgium.

SGG MASTER-LIGNE®

This SGG MASTER-LIGNE door separates and connects rooms simultaneously.

SGG MASTER-LIGNE provides an elegant, functional solution for this screen.

*The combination of SGG MASTER-LIGNE and SGG SATINOVO, all-over etched glass, gives this light, refined area both prestige and comfort.
"Le Anfore" VIP lounge, Fiumicino airport, Rome
Architect: C. Terzi & Studio Valle*

SGG MASTER-RAY®

The unusual way in which sggMASTER-RAY has been cut gives this otherwise simple door a unique appeal.

Used as a partition, sggMASTER-RAY gives this bathroom a sophisticated atmosphere, full of light. Its translucent appearance ensures that privacy is maintained.

Description

Light and contrast

The texture of sGG MASTERGLASS is obtained by casting and rolling the glass between two embossed cylinders. This precisely controlled process produces the distinctive textures in the glass surface. The glass has one textured face and one smooth face. All aspects of the quality of sGG MASTERGLASS textured glass conform to EN 572-5.

Range

The sGG MASTERGLASS range comprises five patterns. The shiny geometric patterns are printed into the glass, and appear transparent on a translucent matte base.

sGG MASTERGLASS					
Thickness (mm)	4	6	8		10
	3210 x 2000	3210 x 2000	3300 x 2040	3210 x 2040	2520 x 2040
Standard dimensions (mm)					
sGG MASTER-CARRÉ	•	•		•	•
sGG MASTER-LENS	•	•	•		
sGG MASTER-LIGNE	•	•	•		
sGG MASTER-POINT	•	•	•		
sGG MASTER-RAY	•	•	•		

Tolerance on thickness: 4 and 6 mm: +/- 0.5 mm; 8 mm +/- 0.8 mm; 10 mm +/- 1.0 mm
For other dimensions, please contact us.

Processing

sGG MASTERGLASS products are suitable for all types of processing. Their attractive appearance can be enhanced by edgeworking and especially when used in sGG CONTOUR curved glass. In sGG MIRALITE CONTRAST silvered glass or sGG EMALIT CONTRAST enamelled glass it transforms traditional wall-cladding. Manufactured in accordance with the most stringent quality standards, sGG MASTERGLASS can be toughened (sGG SECURIT) and laminated (sGG STADIP or sGG STADIP PROTECT). Please contact us regarding the availability of laminated sGG MASTERGLASS. Assembled in sGG CLIMAPLUS DESIGN double glazing, this product provides effective thermal insulation. In sGG STADIP SILENCE acoustic PVB laminated safety glass, it provides the highest levels of sound insulation.

Installation

sGG MASTERGLASS must be installed in accordance with current national safety standards and regulations. As with all textured glasses, the pattern on sGG MASTERGLASS runs in one direction. To obtain a uniform appearance, the cut sheets must be placed side by side with the pattern on the glass running in the same direction. Special care must be taken cutting the glass when continuity of the pattern is required. Please contact us regarding glazing into external applications.

This headboard, comprising sGG MASTER-POINT combines the two functions of effective space management and light-diffusion.
